We operate from many different programs that are funded through grants, so funding is not always available and our waiting list is lengthy. Your application will always be kept on file and we will make it to you depending on a **PRIORITY SCORE**. We will need updated income every **NEW YEAR** and that will determine what you will qualify for. We will contact you when we are ready to begin repairs on your home. It can take up to **THREE YEARS** before we get to your home, depending on funding availability and due to the size of our agency. Thank You for applying and for your patience. We are glad to help and we will be there as soon as we can.
